Circulating Water Temperature Control Systems provide accuracy and reliability; wetted components are stainless steel or non-ferris; **Electric Water Heaters** to 380 deg F and 120 gpm; **Portable Chiller Systems** to 20 deg F and 60 ton; **Circulating Oil Systems** to 700 deg F; **Custom Engineered Systems and Controls** to provide both heating and cooling.

Electric Boilers for Steam and Hot Water Generation, to 5000 PPH. Also available in Stainless Steel.

Natural gas filters and separators for fuel gas and pipeline service. Separators using filters, vanes, cyclones, mesh pads and knockouts to remove solids and liquids from gas. Efficiencies to 0.3 micron. Instrumentation, drains tanks and skid mounting are available.

Industrial Silencers for fans, turbines, engines and P-D blowers; **Vent Silencer** for steam and gas. **Sound Enclosures**, with silenced ventilation and easy equipment access. **Flex Connectors** for fans, round and square.
